Keep in mind that if you hold your fund in a non-registered account, fund distributions are included in your taxable income, whether you get them in cash or have them reinvested.

## 2. Fund Expenses

You don't pay these expenses directly. They affect you because they reduce the fund's returns.

The fund's expenses are made up of a management fee, operating expenses and trading costs. The fund's annual management fee is 1.60% of the fund's value. Because this fund is new, its operating expenses and trading costs are not yet available.

### Trailing commission

Matrix Funds Management pays your investment firm a trailing commission for as long as you own the fund. It is for the services and advice your investment firm provides to you. Investment firms may pay part of the trailing commission to their representatives.

The trailing commission is paid out of the management fee. The rate depends on the sales charge option you choose:

- **Initial sales charge trailing commission** - up to 1.0% of the value of your investment each year. This equals \$10.00 each year for every \$1,000 invested.
